An Icosaphonic Harmony Sequence

Mikhail Kornev

Twenty pitch classes label the vertices. The numbered Hamiltonian path traverses the twelve faces, each yielding a five-note chord. With the pitches fixed, the path is rotated by 120° and 240° about the marked threefold axis, directed from A𝄫 to D. The following pages show the complete sequence in two forms: tuned keyboard notation, indicating the keys to play, and 20-tone pitch notation, indicating the sounding pitches. The two notations follow P. A. Chernobrivets, *Twenty-Tone Equal Temperament* (Saint Petersburg: Renome, 2022; in Russian).

Tuning reference: sounding A4 = 440 Hz. Successive keyboard keys rise by 60 cents. In 20-tone pitch notation, (C, D, E, F, G, A, B) = (0, 3, 6, 9, 12, 15, 18) steps modulo 20; sharps and flats (♯, ♭) raise and lower a pitch by one step; double sharps and double flats (𝄪, 𝄫), by two steps.
